The Texas A&M Health Science Center (TAMHSC) invites applications for two tenure-track, 12 month, faculty appointments in the Department of Health Policy and Management and/or Department of Social and Behavioral Health at the rank of Assistant, Associate, or Full Professor. These positions will draw, in part, on funding associated with Texas Medicaid Waiver activities and will require expertise in Medicaid programs and innovative population health and health services delivery programs. In addition to supporting academic efforts in their home department(s), the faculty members’ research, teaching (and mentoring of graduate students), and outreach efforts will require demonstrated knowledge of state and federal level health policy and health services research and/or community health development research and research methods appropriate to analyzing the effects of health legislation, policies, and programs.

The Medicaid Waiver related elements of the job will require considerable work with health systems and other community health partners in one or more Regional Health Partnerships in Texas. Such will include participation in design and oversight of innovative population health and health services delivery programs, their evaluation, and analysis of associated policy implications.

The Department of Health Policy and Management (DHPM) includes the Master of Health Administration (MHA), Master of Public Health (MPH), and PhD in Health Service Research programs. The Department of Social and Behavioral Health (DSBH) offers the MPH, MSPH and DrPH degrees. The two Departments are administratively located in the TAMHSC’s CEPH-accredited school of public health. The school, and the CAHME-accredited MHA program, are nationally ranked and again recently have received the maximum years of accreditation available.

The DHPM’s 18 faculty provide leadership to three Regents’ approved centers: 1) the NSF-funded Center for Health Organization Transformation, 2) the USA Center for Rural Public Health Preparedness, and 3) the Southwest Rural Health Research Center, along with the Program on Health Workforce and Policy Analysis and the Program on Aging & Long-Term Care Policy. The DSBH’s 14 faculty members provide leadership to the Regents’ approved Center for Community Health Development (a CDC-funded Prevention Research Center), and Program for Research in Nutrition and Health Disparities and Program on Healthy Aging. The TAMHSC also includes ties with other schools at Texas A&M University that ranks among the National Science Foundation’s “Top 20 Academic Research Performers in the United States.”

These positions require candidates who can provide strong research leadership skills combined with knowledge of innovative practices in Medicaid and health services delivery that can build on strong educational programs, excellent faculties and graduate students, and a growing and highly committed alumni. Qualifications include a PhD, DrPH, or other appropriate doctoral degree from an accredited institution in public health or a related field such as administration, health policy, health economics, or medicine; demonstrated record of research and scholarly work in health services management and policy or community health sciences; and highly effective interpersonal skills.

Interested individuals should submit a letter describing their interest in the position, specific qualifications and experiences deemed most relevant to this position, current curriculum vitae, and three references (letters will be requested at a later date) to:

Search Committee for Public Health School Faculty Members c/o Sharli Nucker (srph-hpmsearch@tamhsc.edu) Texas A&M Health Science Center 1266 TAMU College Station, TX 77843-1266
Review of applications will begin immediately and continue until the position is filled. The TAMHSC is an Affirmative Action/Equal Opportunity employer; women and minority individuals as well as persons with disabilities are actively encouraged to apply.
