Doctoral Student/Research Assistant in mHealth Behavior and Policy Research

About the position
The Texas A&M University School of Public Health, Department of Health Promotion and Community Health Sciences is seeking a doctoral student and research assistant in the Doctoral of Public Health (DrPH) program with a passion for public health research. The student will be enrolled as a full-time student in the DrPH program, and work 20 hours a week on research projects related to mHealth behavior and policy. The student will work closely with top researchers at the School of Public Health (ranked among the top 25 Schools of Public Health nationally) and have close interaction with their advisor. The student will get first-hand research experience co-authoring research papers with the advisor. The student will have opportunities to present in national and international conferences, compete for national awards, and join internationally collaborative projects.

The Research Assistantship is reviewed every year and continuous funding depends on good performance. The student is expected to maintain full-time student status and good academic standing. Most fulltime students can graduate within 3 years.

Eligibility of application:
1) Obtained master’s degree by summer 2017.
2) Undergrad GPA>3.0; Graduate GPA>3.3. GRE score>60%.
3) Completed intermediate training in statistics and can independently perform statistical analysis.
4) High proficiency in written and oral communication. A writing sample is required for application.
5) Background in social sciences or related fields such as public health, public policy, education, psychology, sociology.

How to apply:
Please send your CV and 3 reference contacts (name, affiliation, email, phone) and a writing sample to yhong@sph.tamhsc.edu for initial review.
